

# XTENSO 3

## ON HGV CHASSIS — WORKSHOP UNIT

Working height

The XTENSO 3 is an 18.5 m telescopic boom lift with a lateral reach of 13.9 m, designed to be mounted on a 14-tonne heavy truck. It offers unrestricted lateral reach and features a basket with a capacity of 265 kg. Its 180° articulated telescopic jib has an up-and-over height of 5.1 m, allowing it to effectively overcome all types of obstacles (such as tree branches, roofs, balconies or power cables). This configuration brings operators as close as possible to their work area, ensuring comfort, safety and flexibility of movement.

The XTENSO 3 can also be equipped with the Green Pack option, a battery system that allows the platform to operate with the engine switched off, thereby reducing fuel consumption and environmental impact.

# TELESCOPIC AERIAL PLATFORMS

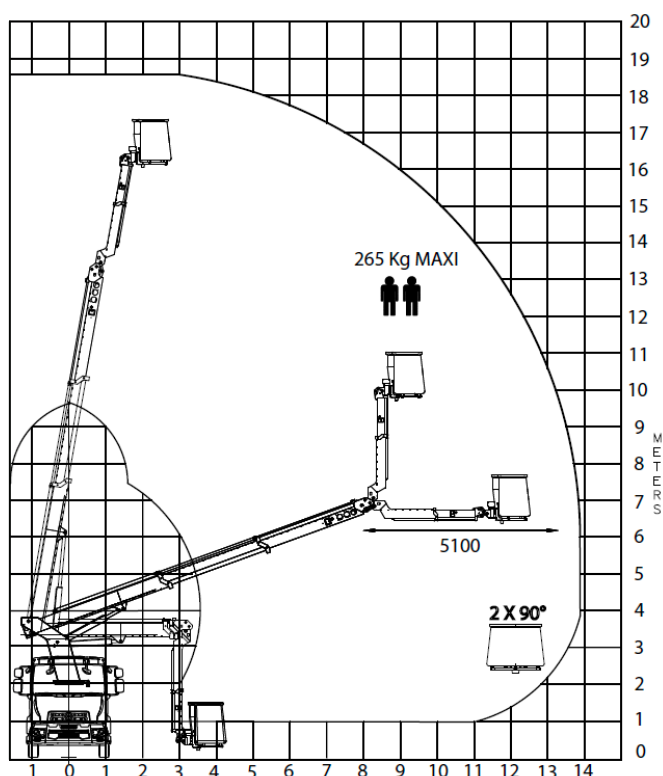

## MOUNTED ON A CHASSIS — WORKSHOP VERSION

### POSSIBLE TYPES OF VEHICLES

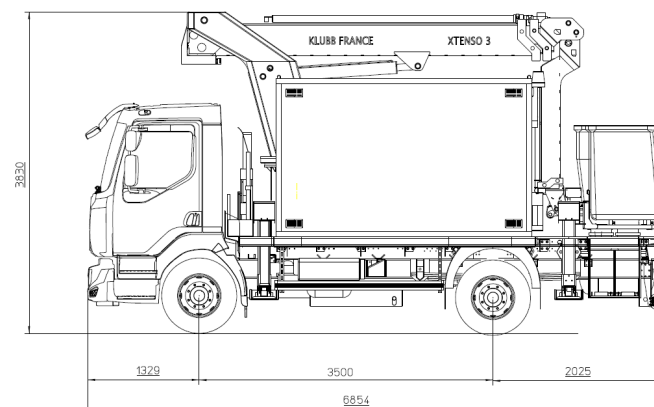

- RENAULT D
- MAN TGL
- MAN TGM
- IVECO EUROCARGO
- MERCEDES ATEGO
- MERCEDES UNIMOG
- GVW: from 14 tons

*For vehicle options, please contact us before ordering.*

### WORKING DIAGRAM

### VEHICLE DRAWING

### STANDARD SPECIFICATIONS

- Engine start and stop from the platform
- Stabilisation with independent controls in the platform and from the ground
- Independent emergency manual pump
- Proportional controls on movements
- Secure access to the work platform
- Hoses and cables inside the structure for maximum protection
- Automatic centering of the platform and turret
- Boom composed of a double telescope and a telescopic jib with 180° orientation
- Telescopic jib for an up-and-over height of more than 5.10 m and allowing 360° ground access
- Hydraulic rotation of the platform in all positions

### OPTIONS

- Signalling (tri-flash, 2 flashing lights, reflective strips)
- 220 V electrical socket in the platform
- Towing hook
- Reinforced suspensions
- Low voltage insulated basket with total opening
- Aluminium storage boxes
- Ladder rack
- Operation cycle without stabilisers
- Green Pack: the platform can be used with the truck engine switched off

*For more platform options, please contact us before ordering.*
