

XTENSO 4

ON RENAULT TRUCKS D18 WIDE Z.E

100 %
electric

Working height

The XTENSO 4, mounted on a Renault Trucks D18 Wide Z.E., offers particularly remarkable performance, with a range of up to 180km thanks to two electric motors totaling 370kW.

Not to mention the fact that it complies with environmental regulations, this aerial work platform with workshop cell offers an impressive working height of up to 21 m and an extended lateral offset of up to 16.40m thanks to its telescopic and pendulum arm.

Equipped with a low-voltage insulated basket, this bucket truck is specifically designed to meet the needs of network operations and public lighting maintenance.

VEHICLE DRAWING

STANDARD SPECIFICATIONS

- Motor stop/start from basket
- Emergency circuit on manual pump
- Proportional controls on all movements
- Secure access to work platform
- Conveyor chain for hoses inside the mast for optimum protection
- Automatic centring of platform and turret
- Lifting arm consisting of a telescopic main arm and a pendulum arm oriented at 180°
- Hydraulic basket rotation in all positions, including on the ground
- Green Pack
- 2 electric motors with a total output of 370 kW (continuous output of 260 kW), 600 V
- Lithium-ion batteries, 200 kWh and 265 kWh, 4 battery packs of 66 kWh each, located in the wheelbase

OPTIONS

- Signalling (tri-cash, 2 ash lights, stripes)
- 220V / Water / air circuit in basket
- Low-voltage insulated basket with total opening
- Aluminium side panels and lockers
- Ladder rack
- Operating cycle without stabiliser
- Fitted workshop cell
